

ROHITHAN P.D

8148341305 | rohithanpd@gmail.com | Coimbatore, India | LinkedIn | GitHub

Executive Summary

Final-year Electronics and Communication Engineering student (Expected 2026) with a strong foundation in AI, robotics, embedded systems, and full-stack development. Adept at analyzing complex problems, implementing practical solutions, and optimizing workflows for both technical and team-based challenges.

Proven leader and mentor, managing large technical teams and guiding peers to achieve measurable results. Skilled at collaborating across teams, gathering knowledge quickly, and delivering innovative, reliable solutions in dynamic environments.

Technical Skills

Languages: Python, Java, JavaScript

Web & Frameworks: MERN Stack (MongoDB, Express.js, React.js, Node.js), Flask, REST APIs

AI & Voice Systems: AI-based Assistants, Speech Recognition, Command Processing

Robotics & Embedded Systems: Autonomous Rovers, Motor Control, Sensor Integration, GPS Modules

Dashboards & Monitoring: Real-Time Data Visualization, System Telemetry, Control Interfaces

Automation & RPA: UiPath RPA

Tools & Platforms: Git, GitHub, Linux, VS Code

Experience

DT Privacy Technologies

Aug 2025 – Oct 2025

Web Analyst & Customer Support Intern (Remote)

- Handled technical support for internal and external users, diagnosing application issues and providing solutions efficiently.
- Analyzed recurring issues and collaborated with technical teams to optimize support workflows and improve documentation.
- Assisted in implementing AI-assisted troubleshooting for faster resolution of customer queries.
- Contributed to internal knowledge base updates to enhance team productivity and reduce repeat issues.

Salzer Technologies

Jun 2024 – Jul 2024

Engineering Intern

- Studied industrial machinery systems and assisted in analyzing operational data.
- Prepared reports to support process optimization and engineering decision-making.

Nitro Technologies

May 2024

Embedded Systems Intern

- Worked with microcontrollers, sensors, and embedded control logic for hands-on project development.
- Implemented test cases and validated sensor integration for small-scale embedded systems.

Projects

Dashboard for UAV System (Defense Application)

Python, Data Visualization

- Built a UAV monitoring dashboard to track system and mission parameters.
- Processed incoming data streams and structured them for visualization.
- Displayed real-time telemetry using charts and status indicators.
- Validated data flow to ensure accurate and reliable monitoring.

BlueBot – Voice Automated Rover

Robotics, Voice Control

- Developed a rover controlled through voice-based commands.
- Converted speech input into movement instructions using control logic.
- Integrated motors and controllers for physical navigation.
- Tested command execution for consistent rover response.

Pet Adoption Platform

MERN Stack

- Developed a full-stack pet adoption platform using the MERN stack.
- Created REST APIs for user, pet, and adoption management.
- Implemented authentication and role-based access.
- Connected frontend components with backend services.

Spec AI – Personal Assistant

Python, AI Concepts

- Built a voice-enabled personal AI assistant for task execution.
- Designed modular command-processing logic in Python.
- Integrated speech recognition and response generation.
- Automated basic system and productivity tasks.

Autonomous Rover for Alerting & GPS Location Marking

Robotics, GPS

- Developed an autonomous rover for location tracking and alerting.
- Integrated GPS modules to capture real-time coordinates.
- Implemented alert logic based on predefined triggers.
- Tested navigation and location accuracy in field conditions.

Leadership

Technical Club President

2024 – 2025

College Technical Club

- Led a technical club of 150+ members and mentored over 25 project teams.
- Guided teams to achieve wins in 8–10 hackathons and supported two student startups.

Certificates

- **Cyber Job Simulation** – Deloitte (Issued Jun 2025)
- **Linux Training** – Indian Institute of Technology, Bombay (Issued Mar 2025)
- **Introduction to Cybersecurity** – Cisco
- **RPA Citizen Developer Foundation** – UiPath
- **Automation Explorer for Students** – UiPath
- **Building Your Leadership Skills** – Coursera

Education

Sri Krishna College of Engineering and Technology

Expected 2026

B.E. Electronics and Communication Engineering

Coimbatore, India
